## **LifeSafety Power Announces New Power Integration with Napco Access Pro Controllers**

*New partnership with Napco Access Pro unifies power, integrating access controller hardware seamlessly into LSP enclosures*

**Phoenix, AZ, January 15, 2025** — LifeSafety Power, in partnership with Napco Security Technologies, continues to build upon its industry-leading innovation and legacy of integrating access control boards and power modules into a single enclosure.

LifeSafety Power announced a new FlexPower® technology alliance with Napco Access Pro, expanding its Unified Power Solutions® with a streamlined enclosure designed to integrate Napco components. Through the partnership, LifeSafety Power's Unified Power Solutions yield a seamless pathway for systems integrators to add access panels and power modules to enclosures. Napco Security Technologies, Amityville, N.Y., has been serving the security industry since 1969, focusing on delivering innovative, labor-savings features to dealers and integrators.

This new Unified Power Solution allows security integrators to take advantage of a single chassis engineered to coordinate electrical and mechanical integration, providing faster, time-saving installations and greater service efficiencies for Napco installations. A removable back plate controller wiring configuration and expansion slots are ready for easy installation of additional power distribution modules and Napco panels. The unification is also compatible with Napco's C1CP2800 Super Speed 8 or 16 Door Access Controller module. The preconnected power section further saves field time and an AC disconnect point makes servicing straightforward. The enclosure also includes space for LifeSafety Power NetLink® Network Connectivity modules for intelligent managed power. NetLink technology enables detailed power health reporting, remote troubleshooting and battery testing, email/SNMP alerts and other proactive and predictive data.

The new [Unified Power Solution for Napco](#) joins the growing list of access control integrated power options available from LifeSafety Power. LifeSafety Power has over 15 OEM partnerships covering a wide range of component manufacturers.

Invented by LifeSafety Power in 2010, FlexPower Unified Power eliminates the use of three separate enclosures formerly deployed for access control installations. It requires less wall space, wiring and only one AC drop, resulting in up to 50 percent space savings and as much as 40 percent installation savings.

### **About LifeSafety Power\***

LifeSafety Power is a premier manufacturer of intelligent power management systems for physical security and access control and the chosen standard for many Fortune 500 companies around the world.

LifeSafety Power has created new categories of access control power including intelligent power solutions which increase the reliability of the security infrastructure, while prewired components decrease labor and yield more consistent installations across an enterprise. These innovations have led to LifeSafety Power becoming the power solution of choice for leading access control panel OEMs throughout the security industry.

LifeSafety Power is part of the ASSA ABLOY Group and is headquartered in Phoenix, Arizona. For more information, please visit [LifeSafety Power](#) or call (888) 577-2898.
