Product Discontinuation Notice

Dear Valued LifeSafety Power Customer,

We are excited to announce the upcoming launch of the NLC and NXB, the next generation of LifeSafety Power NetLink® modules, scheduled for September 2025. As we transition to these new NetLink Connect boards, the current NetLink boards will be discontinued by the end of this year.

To assist with this transition, your LifeSafety Power representative can provide a sample each new board upon request for testing. Additionally, LifeSafety Power can share a copy of the internal Pen testing results at a later date.

This letter outlines the affected parts, End of Life timelines, and replacement product availability due to this portfolio transition.

Summary of Discontinued Part Numbers

LSP Part Numbers	Description	Replacement Part Number	Parts up for Last Time Buy	Procurement Date
NL4-BOXED	NL4 board, boxed	NLC-BOXED	X	3/15/2026
