LifeSafety Power Honored in SecurityInfoWatch.com Readers' Choice Awards

LifeSafety Power B150 Intelligent Step-Down Converter and LED Light Kits selected as top products after more than 2,200 security pros cast their votes

Phoenix, AZ, November 18, 2025 — LifeSafety Power is pleased to announce that its LED Light Kit has been named the top product in the SecurityInfoWatch.com Readers' Choice Product Awards in the Installation Tools category, and its B150 Intelligent Step-Down Converter has been named the top product in the Power Supplies category.

LifeSafety Power LED Light Kits are designed for easy installation and reliable visibility inside any E4, E6, E8, or E12 enclosure. Powerful magnetic mounting and lever-connect wiring allow fast, tool-free installation into LifeSafety Power traditional, Unified Power Solutions®, or ProWire® systems. There are two available lengths designed to supply lighting for various enclosure sizes. A Passive Infrared (PIR) motion sensor controls the lighting, turning it on or off when the enclosure door is opened or closed. Automatic voltage selection allows seamless usage at either 12 or 24VDC, which may be sourced from any available 12 or 24VDC output.

The B150 Intelligent Step-Down Converter transforms single-voltage systems into dual voltage with remote management via NetLink. It provides a fixed 12VDC output and an adjustable 3V–18VDC output, each delivering up to 6 Amps. An LED display shows voltage, current, and input power for instant feedback. Advanced protections—overcurrent, overvoltage, and thermal shutdown—ensure reliability. Compact and cost-effective, it suits space-limited environments. Ideal for card readers, access panels, CCTV, intercoms, IT devices, and low-voltage electronics, the B150 offers flexibility, efficiency, and robust performance for commercial applications.

The SecurityInfoWatch Readers' Choice Awards recognize the most impactful products introduced in the physical security industry over the past year (April 2024 through June 2025) in 20 different categories. The program is judged and decided by the very people who use and install these products every day. In all, more than 2,200 security professionals participated in the voting.

"SecurityInfoWatch congratulates all of the honorees in our annual Reader's Choice Awards," said SecurityInfoWatch Editorial Director Steve Lasky. "These products represent the best of the best among the newest technologies that are helping to secure people and property."

Visit www.securityinfowatch.com/readerschoice for the full list of the winning products, or print subscribers can check them out in the annual Winter Big Book product guide, a special December 2025 bonus publication to Security Business, Security Executive, and Locksmith Ledger magazines.
