

Software Release Notes Summary for PDU

3.0.4 Software

Enhancements:

- Added missing Battery State of Health (SoH) status bar.
- Added configurable Battery SoH threshold settings.

Fixes:

- Fixed Headroom Current decimal formatting during initial login.

3.0.2 Software

Enhancements:

- Added support for configuring a domain name for the MSM server.

3.0.1 Software

Enhancements:

- Renamed “Alerts” to “Alert Triggers.”
- Updated wording in the Output Configuration and Auxiliary Inputs sections.
- Improved the Load Capacity display.

Fixes:

- Fixed temperature values displaying with excessive decimal places.

3.0.0 Software

UI / Framework:

- Updated the UI to match the new NLC interface.

Enhancements:

- Added support for connecting T4 and Sensor modules via RS-485.

2.4.53 Software

Fixes:

- Fixed an issue where alarms did not trigger on the first startup after SD card flashing until the unit was rebooted.

Note:

- This issue does not affect shipped units, as all shipped units have been rebooted at least once.

2.4.52 Software

Fixes:

- Fixed an issue with Event status reporting.

2.4.48 Software

Enhancements:

- Added support for connecting FP, M8, B150, SD16, and SD4 via RS-485.

Note:

- Requires MCU firmware version 1.4 or later.

2.4.45 Software

Enhancements:

- Added a boot-up delay setting to control output timing and sequencing at power-up.

Note:

- Requires MCU firmware version 1.3 or later. Refer to “Upgrade PDU MCU to Version 1.3” for details.

1.4.42 Software

Security Fixes:

- Upgraded the Bootstrap JavaScript library from version 3.4.1 to 4.6.2.

1.4.41 Software

Security Fixes:

- Resolved known security vulnerabilities.

1.4.37 Software

Fixes:

- Fixed an issue where MSM could not display the PDU remote IP address.

1.4.34 Software

Enhancements:

- Added MCU firmware upload via the web interface.

Fixes:

- Fixed an issue where the FAI status did not match the hardware LED status.

1.4.30 Software

Enhancements:

- Added support for encrypted firmware.

1.2.27 Software

Enhancements:

- Enabled all configuration page settings, including MSM Settings, Time Settings, and User Settings.
- Added MSM connectivity.

1.0.0 Software

Release:

- Initial release.
