Overview

EPLT-1M expansion plate is compatible with any MCLASS wallmount enclosure or RGM rackmount drawer and fits into any slot normally reserved for a Mercury 6X8 board (EP1502, MR52).

Additionally, the EPLT-1M may be installed in a VCLASS (Vertx) wallmount enclosure to mount a Genetec Cloudlink controller alongside VertX controllers.

The EPLT-1M includes all mounting hardware and provides mounting for additional Mercury EP1501 or MR50 boards, LifeSafety Power accessories, or a Genetec Cloudlink module.
