

Overview

SCLASS™ Unified Power Systems are engineered to house FlexPower® power modules alongside SWH iSTAR™ access hardware in one compact listed enclosure.

This unit is a dual voltage 12 and 24VDC, access power system. A C8 lock control module provides eight access control inputs capable of voltage or dry contact activation, and eight outputs programmable for failsafe / failsecure operation at either 12 or 24 VDC and controlled by the integrated fire alarm interface circuit on the FPO. The D8 auxiliary distribution module provide eight fused outputs rated at 3A per output and each output configurable for 12 or 24VDC operation.

SCLASS enclosures are painted steel with removable backplate and include lock, two (2) keys and tamper switch.
