Overview

MCLASS™ unified power systems are engineered to house FlexPower® power modules alongside Mercury™ access hardware in one compact, secure system. This unit is a 400W, dual voltage 12 and 24VDC, access power system. Two C8 lock control modules provide sixteen access control inputs capable of voltage or dry contact activation, and sixteen outputs programmable for fail safe / fail secure operation at either 12 or 24 VDC and controlled by the integrated fire alarm interface circuit on the FPO. Two D8 modules provide sixteen auxiliary outputs and each output is configurable for 12 or 24VDC operation.

MCLASS enclosures are painted steel with removable backplate and include lock, two (2) keys and tamper switch.
