Overview
MCLASS™ Unified Power Systems combine FlexPower® power modules alongside Mercury Security™ access hardware in one compact and secure UL Listed solution. The FPO Power Supply / Battery Charger provides two power outputs user selectable for 12 or 24 VDC. One output provides continuous output power for system use, the second is resettable output power, activated when the fire alarm disconnect is initiated.

For access or lock power, three D8 modules provide twenty-four class II power limited outputs rated at 2.5A each and each output is individually programmable for constant output or FAl disconnect.

MCLASS enclosures are painted steel with removable backplate and include lock, two (2) keys and tamper switch.
