Overview
MCLASS™ Unified Power Systems combine FlexPower® power modules alongside Mercury Security™ access hardware in one compact and secure UL Listed solution. This unit is a 12V or 24V DC single voltage network managed access power system. One M8 managed control module provides eight access control inputs capable of voltage or dry contact activation and eight outputs programmable for failsafe / failsecure operation at either 12 or 24 VDC and controlled by the integrated fire alarm interface circuit on the FPO.

MCLASS enclosures are painted steel with removable backplate and include lock, two (2) keys and tamper switch.
