LifeSafety Power® Featured on FacilityExecutive.com for OutSmart™ Technology

Leading end-user media resource FacilityExecutive.com highlights new voltage verification technology and the benefit to commercial specifications.

Libertyville, IL, May 17, 2019—LifeSafety Power Inc. has been recognized in leading end-user publication and online resource [Facility Executive](#) for its new OutSmart Technology and the benefits it brings to the customer in system integrity and project cost savings.

Published under the headline: “LifeSafety Power Outsmarts Voltage Application Errors,” the article features the [award-winning](#) OutSmart™ Technology, a series of dual-colored green (12V) and blue (24V) LEDs that provide instant visual verification of appropriate voltages—important to streamlining installations and avoiding damage to sensitive and costly access control components. OutSmart Technology alleviates the need for systems installers or facility technicians to measure every individual output with a voltmeter to confirm its setting—a big time and labor savings across an enterprise or campus.

OutSmart comes standard across the LifeSafety Power product line. For more information on this new capability or other solutions, contact [LifeSafety Power](#) or call (888) 577-2898 today.

About LifeSafety Power*
