LIFESAFETY POWER MEDIA RELEASE

For immediate release

LifeSafety Power® Sets Sights on GSX 2018 with Product Releases and Booth Enhancements Highlighting an Innovative Category of Data-Driven Power Solutions

Award-winning Multi-Site Manager-Enterprise, ProWire Unified Power and other leading solutions on display at Booth 2765 will focus on the new state of power: data-gathering devices that yield superior system integrity and uptime for the end user.

Mundelein, IL, September 12, 2018—LifeSafety Power Inc. heads to the Global Security Exchange (formerly ASIS International Conference and Exhibits), September 24 through 27 in Las Vegas, riding the coattails of recent product awards and groundbreaking innovation in power, security and access control.

With continued advancements created by LifeSafety Power in intelligent networking, users can now get a real-time look at the health of power-connected solutions across an enterprise or single location. This data, helps them proactively predict and preempt component failure (such as a failing electronic lock), assess overall solution integrity and perform managed power services.

Award-winning MSM-Enterprise

Booth 2765 will feature Multi-Site Manager-Enterprise (MSM-Enterprise™), named a Security Today 2018 New Product of the Year. MSM-Enterprise is PC-software driven and has the ability to manage hundreds of power-connected systems, extracting critical information on the well-being of components. MSM-Enterprise provides detailed data on operability and viability through information gathered on power variances or voltage events. As a result, users can monitor, assess, maintain and troubleshoot proactively for greater system uptime.

Also at GSX18, LifeSafety Power will showcase a new standard in power—ProWire™ Unified Power access management systems. ProWire makes it simple to create a connected power campus, eliminating installation variability for consistent, repeatable and professional results. UL/ULC certified, ProWire's precision wiring design shaves off hours of internal panel wiring. Network-connected ProWire systems can also interface directly into Mercury Security or Software House C-Cure 9000 platforms, allowing users to receive, manage and control alerts and notifications.

LifeSafety Power will also feature its flagship, modular FlexPower® Unified Power and new integration with Digital Monitoring Products (DCLASS). DCLASS™ features mechanical and electrical integration of power, access control hardware and lock power in a single, certified enclosure supporting two to 18 doors of access control. DCLASS is designed to easily add networking capabilities for intelligent data collection, battery management and monitored power services.

Additional products on display during the show include Vantage™, a best-in-class pricing, performance and value in a ready-to-install power system; and Gemini™, the award-winning rackmount configuration that solves small space dilemmas with a sleek footprint integrating power and access control. New integrations with technology partners Integrated Control Technology (ICT) and Identiv Inc. will also be featured at the booth.

About LifeSafety Power*

LifeSafety Power has effectively shifted the paradigm of the power supply industry by creating a new category of intelligent power management solutions that provide robust, proactive analytics to mission-critical devices. This new standard of performance by LifeSafety Power substantially adds to overall system health, performance and reliability. LifeSafety Power, headquartered near Chicago, has won numerous industry awards and accolades for product design and innovation. For more information, please visit LifeSafety Power or call (888) 577-2898.
