## **LIFESAFETY POWER MEDIA RELEASE**

*For immediate release*

### **LifeSafety Power and Identiv Create Technology Partnership**

*New mechanical integration offers a self-contained rack-mounted power solution*

**Mundelein, IL, November 29, 2018**—LifeSafety Power® Inc., the industry's only provider of intelligent networking power solutions, has forged a technology partnership with Identiv, the leading global provider of physical security and secure identification, providing greater integration and visibility to connected power solutions in access control specifications.

The technology partnership between Identiv and LifeSafety Power presents an out-of-the-box, sleek, space-saving access control rack configuration that allows a compact mounting of Identiv's Hirsch Mx Controller (available in 2-, 4- or 8-door configurations) and readies installers and systems integrators for intelligent power monitoring and greater network visibility. Integrators and security personnel can benefit from the powerful analytics included with Identiv's Hirsch Velocity Software for security management, people movement, alarm management and security device operations in addition to LifeSafety Power's NetLink Network Communication and Multi-Site Manager-Enterprise power intelligence.

Through the partnership, NetLink users and system installers can proactively maintain their deployments and provide remote service and managed monitoring capabilities that include battery standby testing, AC and system fault alerts, remote power cycling for use during troubleshooting or scheduled operational tasks and defective lock detection.

"Identiv is focused on extending the capabilities of our access control platforms through technology partnerships like that forged with LifeSafety Power," said Sam Tuthill, Senior Product Manager, Identiv. "Now, not only can we provide comprehensive security, but we are also able to offer enhanced visibility into powered devices across the enterprise so users can gain better insights into systems with proactive diagnostics and the ability to control power solutions across the city or globe."

As LifeSafety Power continues to reshape and reinvent the power category into an intuitive system by bringing data and intelligence to connected solutions, establishing partnerships with leading access control innovators such as Identiv is key.

"We're excited to reach new users and systems integrators through the partnership with Identiv," said Larry Ye, CEO and President, LifeSafety Power. "The available capabilities offer increased uptime at the protected premises and the ability to foresee and head off potential problems with power and access control deployments, meaning a more reliable solution overall."

For more information on the Identiv partnership or LifeSafety Power's award-winning products that assess the security infrastructure's power status in real time, visit [lifesafetypower.com](http://lifesafetypower.com) or call 888-577-2898.

#### **About LifeSafety Power\***

LifeSafety Power has effectively shifted the trajectory of the power supply industry by creating a new category of intelligent power management solutions that provide robust, proactive analytics to mission-critical devices. This new standard of performance by LifeSafety Power substantially adds to overall system health, performance and reliability. LifeSafety Power, headquartered near Chicago, has won numerous industry awards and accolades for product design and innovation. For more information, please visit LifeSafety Power or call 888-577-2898.
