FlexPower Gemini™ RGM Series from LifeSafety Power Wins Prestigious MVP Award

Award recognizes innovation in unified, compliant, rackmount power

Mundelein, IL – April 11, 2016—LifeSafety Power Inc., a leader in Smarter Power Solutions and patented remote networking capabilities, received a 2016 **Most Valuable Product (MVP) Award** from Security Sales & Integration (SSI) magazine for the FlexPower® Gemini RGM power management system.

The RGM rackmount solution is the first and only fully Underwriters Laboratories (U.S.) and Underwriters Laboratories Canada listed enclosure incorporating Authentic Mercury hardware, operating power modules and optional power in a completely compliant rackmount solution. Gemini RGM was entered in the Miscellaneous Security Products category, Power Management Device and the company received their award at a special ceremony during ISC West 2016 in Las Vegas.

The breakthrough for Gemini RGM is the mechanical drawer design and the UL/cUL listing for all integrated components (power and Mercury Security controllers) within the enclosure solution. The product is engineered to save space and provide installation efficiencies in the field while compactly and securely mounting Mercury Security access controllers in a 19-inch rack environment that is perfect for data centers and IT closets. RGM can be scaled easily in four-door increments, limited only by the controllers' total door capacity. When deployed with LifeSafety Power network communication modules, integrators can remotely monitor power to both Mercury panels and locks to provide additional managed services to customers while adding recurring monthly revenue.

"Our mission and philosophy is to address the needs of the marketplace through constant and consistent innovation," said Larry Ye, president of LifeSafety Power, Mundelein, Ill. "Winning an MVP award is satisfying in that the industry continues to recognize and embrace our accomplishments in research and development. We will continue to provide the kind of networked, remotely managed power solutions that are so critical to systems integrators and their end-user customers," he said.

LifeSafety Power previously won the MVP award in 2015 for **Helix™**, redundant power management systems and in 2014 was presented with an **SSI Top 30 Innovations** award and the Security Industry Association's **New Product Showcase award for iSCAN®**, network managed power solutions that have revolutionized the power category.
