*For immediate release*

### **LifeSafety Power® Teams with Access Control Category Leader Paxton Access**

*New partnership delivers power solution enclosure with integral installation efficiencies*

**Mundelein, IL** – August 15, 2016—LifeSafety Power® Inc., Mundelein, Ill., a leader in Smarter Power Solutions and patented remote networking capabilities and Paxton Access, Inc., Greenville, S.C., designer and manufacturer of innovative IP access control and intelligent solutions for smart buildings, have entered into an exciting new partnership. Now, systems integrators will have availability to the new FlexPower® PCLASS™ Unified Power Solutions for Paxton Access™.

The FlexPower PCLASS Paxton Access Control Power System is engineered to integrate operating power and a mechanical housing for Paxton Access Net2 controller hardware. The seamless enclosure simplifies system design and is available in 4-, 8- and 16-door configurations in both single and dual voltage. Net2 is a proprietary and secure networked access control system that yields the advantages of central control, event reporting and flexible functionality. Eight-door configurations yield up to a 40 percent space savings and 30 percent installation savings while 16-door units offer up to a 60 percent space savings and 40 percent installation savings.

LifeSafety Power is a constant innovator in the power category, providing the latest networking technologies that yield a wide range of specification possibilities and the ability for integrators to remotely monitor, assess and service systems solutions.

“It’s all about working with the right partners to continue our command of the category and bring proactive service to customers, including remote testing and servicing,” says Larry Ye, president of LifeSafety Power. “The exemplary capabilities of our Paxton Access Power Solutions give systems integrators superior technology to pass along to end-user customers while offering another category of managed services and recurring monthly revenue,” he says.

“We’re pleased to be partnering with LifeSafety Power for their PCLASS power solution,” says Chris Wilson, product manager, Paxton Access. “With the new PCLASS, Paxton customers now have an easy option for more controller density in one location. The unified solution makes Net2 controller installations even simpler and cleaner.”

Other integral features designed to optimize installation efficiency, space utilization and service include: removable back plate; flexible mounting pattern; pre-wired access accessories; wide channels; pre-drilled hole patterns; and 4.5-inch cabinet depth. A network option is available to monitor system and battery health.

#### **About LifeSafety Power\***

LifeSafety Power is the leader in Smart Power Solutions and patented remote monitoring capabilities, providing modular AC, DC and PoE power systems that meet the growing needs of the life safety and security industries. The FlexPower® and NetPower® product lines are high performance, network-connected, power management systems listed for access control, fire alarm, intrusion, CCTV and Mass Notification applications. LifeSafety Power, headquartered in Illinois, has won numerous industry awards and accolades for product design and innovation.
