LifeSafety Power® Gears up for PSA-TEC 2016

***Presenting new BICSI Accredited Coursework; showcasing premier vendor status, recent awards
and new directions at leading systems integration conference.***

Mundelein, IL – April 19, 2016—LifeSafety Power® Inc., a leader in Smarter Power Solutions and patented remote networking capabilities, will present a newly BICSI accredited continuing education credit course during PSA TEC 2016, May 9 through 12 in Westminster, Colo., as well as highlight other recent announcements and accomplishments at the annual integrator-centric event.

The CEU session scheduled for Monday, May 9 at 1:15 p.m., LifeSafety Power Factory Certification Course has been recognized as qualifying to earn BICSI technicians three certification credits. The course will be taught by Joe Holland, LifeSafety Power's vice president of Engineering and a co-founder of the company, who will provide in-depth training on the LifeSafety Power approach to power management design and installation.

LifeSafety Power will also be at the show in its new role as a PSA Security Premier Vendor, making it an integral part of the world's largest electronic security cooperative and a notable manufacturer of networked power solutions. The company will be at exhibit space A36 on Wednesday, May 11, providing the latest information on its product line, including the award winning FlexPower® Gemini RGM, a compact, rackmount solution that provides a complete mechanical drawer design with the UL/cUL listing for all integrated components (power and Mercury Security controllers) within the enclosure. The product saves space and provides installation efficiencies in the field while compactly and securely mounting Mercury Security access controllers in a 19-inch rack configuration suited for small footprints such as data centers and IT closets. When deployed with LifeSafety Power network communication modules, integrators can remotely monitor power to both Mercury panels and locks to provide additional managed services to customers while adding recurring monthly revenue.

Recent award winner

LifeSafety Power received a 2016 Most Valuable Product (MVP) Award from Security Sales & Integration (SSI) magazine for Gemini RGM at ISC West 2016. The company is a perpetual innovator, previously winning the MVP award in 2015 for Helix™, redundant power management systems and in 2014, an SSI Top 30 Innovations award. Also in 2014 the company received the Security Industry Association's New Product Showcase Award for iSCAN®, network managed power solutions that have revolutionized the power category. For more information, visit LifeSafety Power or call (888) 577-2898 to set up your meeting at PSA-TEC.

About LifeSafety Power -- Power is Knowledge™

LifeSafety Power is the leader in Smart Power Solutions and patented remote monitoring capabilities, providing modular AC, DC, and PoE power systems that meet the growing needs of the life safety and security industries. Realizing that network technology presents new opportunities for active monitoring and management of power supplies connected to access control systems, fire systems, video surveillance and more, the company has built its products from day one with intelligence and functionality in mind. LifeSafety Power's current product offering and planned future innovations in battery test, display and diagnostics represent an important step in providing overall system reliability and uptime.
