*For immediate release*

### **New LifeSafety Power® ProWire™ Unified Power Systems Streamline Access Installations and Promote Project Standardization**

*ProWire eliminates hours of panel wiring, lock control and communication wiring and provides a standard installation platform that improves system uniformity and streamlines service and maintenance.*

Mundelein, Ill., September 22, 2017 – LifeSafety Power Inc., the preeminent manufacturer and creator of intelligent power, has released ProWire Unified Power Systems, the highest level of integration between a power system and an access control solution.

ProWire delivers a pre-wired, UL/CUL certified power solution that is ready-to-install, simplifying and standardizing access installations across an enterprise. ProWire models come standard or networked for intelligent power monitoring and are designed with quick-connect terminal strips that incorporate Authentic Mercury or Software House access control hardware.

ProWire precision factory wiring eliminates field wiring variability so integrators and end users can establish equipment installation standards for uniform operation, maintenance and servicing of the physical security system. Direct-drop shipment brings the prewired panels to the job site at time of installation, saving integrators and end-users the time and expense of ordering, expediting and coordinating components necessary for field-wired installations.

“ProWire Unified Power provides many benefits to the user and the installer. It’s a 100 percent factory tested, easily configurable system that gives users a streamlined, professional product installation every time, at every location,” said Larry Ye, LifeSafety Power’s President and Chief Executive Officer. “We understand how expensive time in the field can be and our goal is to provide quality products that yield labor and installation savings while easing deployment for users at their facilities. ProWire Unified Power has it all.”

Benefits of ProWire include:

- All-in-one solution ready to install
- Detailed wiring documentation and specs
- Direct drop shipments simplify job planning and logistics
- Highest quality and reliability/100% factory testing

ProWire helps bring installations to the next level while providing a certified system that’s simple and straightforward to specify at every user location. Its universal installation platform eliminates the complexity, variability and time of field assembly, improves system uniformity and allows standardized maintenance and service. #### **About LifeSafety Power**

LifeSafety Power® is the leader in Smart Power Solutions and patented remote monitoring capabilities, providing modular AC, DC and PoE power systems that meet the growing needs of the life safety and security industries. The FlexPower® and NetPower® product lines are high performance, network-connected, power management systems listed for access control, fire alarm, intrusion, CCTV and Mass Notification applications. LifeSafety Power, headquartered in Illinois, has won numerous industry awards and accolades for product design and innovation. For more information, please visit LifeSafety Power or call (888) 577-2898.
