LifeSafety Power® Wins Security Today 2019 Govies Award for OutSmart™ Technology

New product feature gains notoriety for smart capability that actively prevents voltage application errors.

Libertyville, IL, April 2, 2019—LifeSafety Power Inc. has won a 2019 Govies Government Security Award from Security Today for its new OutSmart™ Technology, a visual voltage verification feature that simply but succinctly identifies appropriate voltages with dual-color LEDs. Awarded in the Access Control Devices/Peripherals category, OutSmart prevents installation errors and the potential for applying incorrect voltages to sensitive access control equipment and other components by giving immediate, instant confirmation of the voltage setting with green (12V) and blue (24V) dual color-LEDs for each output.

"For the past ten years, Security Today and GovSec have hosted The Govies, and I have been amazed at the innovation and technology entered in this product contest. Truly, manufacturers are ramping up their research and development, bringing top-quality solutions to the government vertical," said Ralph C. Jensen, editor in chief of Security Today and GovSec magazines and securitytoday.com. In addition to being honored at ISC West, winners will be featured on securitytoday.com and highlighted in a future issue of GovSec magazine.

OutSmart allows technicians to proceed quickly with their installation by eliminating the need to measure each output with a voltmeter to confirm its setting. The new feature comes standard across the entire LifeSafety Power product line as a free upgrade to power supply boards, auxiliary output boards and network-managed output boards.

"Being recognized by our peers in the industry for innovation like OutSmart Technology is important to LifeSafety Power as we continue to meet the demands of government and other vertical market customers as well as the installing technician," said Larry Ye, President and CEO of LifeSafety Power. "OutSmart ensures the correct voltages are applied and there's no damage to sensitive and expensive access control components, critical to government users and their equipment. We are excited to receive The Govies award and to add it to our growing line of awards and accolades for innovation in intelligent power solutions."

LifeSafety Power will showcase OutSmart Technology during ISC West 2019, April 10-12, booth 13115. For more information on this new capability or other solutions, contact LifeSafety Power or call (888) 577-2898.

About LifeSafety Power*

LifeSafety Power continues to earn industry accolades and respect for product design and innovation, carving out a new category of intelligent power management solutions that provide robust, proactive analytics to access control, security and mission-critical devices. This new standard of performance by LifeSafety Power substantially adds to overall system health, performance and reliability. LifeSafety Power, headquartered near Chicago, has won numerous industry awards for product design and innovation, including a 2018 New Product of the Year from Security Today. For more information, please visit LifeSafety Power or call (888) 577-2898.
