

FOR IMMEDIATE RELEASE

## **Industry Veterans Form LifeSafety Power - Product to be Introduced at ISC West**

**Windham, New Hampshire, USA** –Sept. 2009, LifeSafety Power, Inc., has been formed by a group of industry professionals highly skilled in electronic engineering, high volume electronic manufacturing and the security/lifesafety industry. Their first product offering, the revolutionary FlexPower line, will be rolled out at the ISC West Show in Las Vegas on March 24, 2010.

FlexPower consists of seven base power supplies and six accessory modules, which can be grouped in any combination and supplied in either of two enclosures. All products are agency-listed for use in the United States and Canada, and have been developed to meet the expanding needs of the lifesafety industry, focusing on Access Control, Fire Alarm, Intrusion, Mass Notification and CCTV powered solutions. The product line strategy eliminates the need for multiple products that essentially fulfill the same purpose. Unique, trademarked, features include: VSelect, TrueWatt, SureCharge, Datalink, PowerCom, FlexConnect, Reliability+ and GreenSmart.

The FlexPower line has been designed to provide greater product reliability, increased flexibility, shorter install time, smaller service inventory and an intelligent, economical solution to the problem of reliable system power and service.
