MSM-200 Enterprise Manager - New Appliance that Monitors Power at Multiple Remote Sites with Ease & Efficiency

Mundelin, IL- February 20, 2015 – The FlexPower® Multi-Site Manager (MSM-200) is a smart, network-based appliance that securely manages LifeSafety Power's power management systems across any enterprise. The web-based software and hardware solution uses a Virtual Private Network (VPN) server to securely interface with multiple NetLink communication modules and iSCAN® SmartPower Systems, providing real-time health assessments of power systems on the network.
