## **LifeSafety Power® introduces BiTSTREAM™ High Power, PoE Solutions for Access Control**

A 1new, low-cost power system for installers with the inherent efficiencies of ProWire's precision wiring design.

**Libertyville, IL, September 1, 2020** — LifeSafety Power is meeting an increased demand for high power PoE systems with its new BiTSTREAM™ line of PoE based access control power management systems. LifeSafety Power is meeting an increased demand for high power PoE systems with its new BiTSTREAM™ line of PoE based access control power management systems. BiTSTREAM is a family of IEEE 802.3bt-compliant PoE midspan injectors and PoE powered DC power supply/chargers specifically designed for the access control and security industries. With BiTSTREAM, installers can eliminate the need for a high voltage electrician while simplifying access control installations with features such as integrated fire alarm disconnect, battery charging, and remote monitoring and control.
