LifeSafety Power® Unveils Gemini RGL for Power-Centric Solutions

New product lets systems integrators customize a power drawer in a rack mount configuration for added specification flexibility.

Libertyville, IL, May 17, 2019 — LifeSafety Power Inc. continues to add innovative products to its line of power solutions, unveiling the FlexPower® Gemini™ RGL rack mount power management system. Gemini RGL is a compact, 19-inch rack tower engineered for data centers, IT closets or other areas where space is limited. It handles any LSP power controller board, giving the systems integrator the ability to create a power-centric-only drawer for larger enterprise access control and other systems.
