### Remote Management and Control

- Port notification (email) on over voltage, over current condition
- Remote PoE shutdown per port or all ports simultaneously
- Programmable front panel input for port shutdown
- PowerCom-PoE GUI displays voltage, current, power, and port status
- Ideal for access points, PTZ cameras, video, phones, access control, IR illuminators, and other PoE edge devices

### Product Specifications

- Input range: 120-240VAC or 48VDC
- 10/100/1000 data rates
- 8 or 16 ports - all ports PoE+ IEEE 802.3at

- Web-managed, port power cycling
- Notification if port is over a preset current
- Notification when port output loses voltage
- Integrated 48V charger for battery backup

The NetPower midspan injectors provide power and pass data to PoE compliant devices, such as IP cameras, door locks, IR illuminators and other access control edge devices.

Features include: 16 ports at 32W/port, remote management via LAN/WAN, plug and play operation, remote PoE shutdown per port or all ports simultaneously, and 10/100/1000BaseT Gigabit support.

NetPower midspans also include a 48V battery charger for cost effective back-up power vs traditional backup methods.

NetPower midspans are housed in a 1U rack mountable metal enclosure and accept 120 to 240V universal AC or 48V DC input operating voltage.

### Product highlights

- True remote managed system
- 32W per port, IEEE 802.3at – all ports
- 10/100/1000Base T Gigabit support
- Email alert for port over/under current
- Email alert for port over/under voltage
- Remote on/off port control
- 48V lead acid battery charger

### Reliability and Safety

- RoHS Compliant
- 10 year warranty
